Claim Objections

Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-8 have not been further treated on the merits.

Claims 2 and 9 are objected to because of the following informalities: The limiting features are directed to a process step whereby these limitation do not add weight to the patentability of a article claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, and 9-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the admitted prior art 06315349 Japan or 01310612 Japan. These applications were provided on an I.D.S. entered 5-30-2006.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Masek, and Masek '530 and Masek'285 are cited to show structure similar to the claimed invention.
